

The interview:

Interview with João P.

D: Hello how are you?

J: I'm fine thank you for asking

D: So, first of all, thank you for joining our interview. I and my team would like to ask you 5 questions about your car "Tesla".

J: Yes of course. Let's do it!

D: Our first question. What is it like to drive a Tesla?

J: Many people ask me that. I own my Tesla since 2018 and it isn't my only car. I also drive an Audi. Driving a Tesla is like driving a normal car but there is a little difference. It's electric and not powered by gasoline. My Tesla does not have as many buttons as my Audi. You must use a touchscreen to change the temperature and not buttons.

D: Interesting, I didn't think it was the same for you to drive a normal car like a Tesla. How often do you use your Tesla, like per week?

J: I drive my car 3-4 times a week. Sometimes I drive it on weekend. I usually change the car every day or every other day.

D: Where do you charge your Tesla?

J: I charge my Tesla at home or a gas station that has a supercharger.

D: What are your experiences with Tesla?

J: I have good experience driving a Tesla. The acceleration is insane. Sometimes I like to use Autopilot, the technology behind it is ridiculous. Doing long-distance trips are difficult. Unlike a gas car where you might fill it up and wait till near empty before stopping for gas, an electric car is different. The car charges most efficiently in the mid-range. I rarely charge past 80% and rarely below 20%. This allows me to plug in a supercharger for 20 minutes as I go to the restroom and get a small snack.

D: Do you know other people who drive a Tesla?

J: Not really, but in the city, I see about 2-3 Teslas per month.

D: Where do you see Tesla in the future?

J: Good question. I think they are going to evolve a lot in the next few years and increase their market share. In addition, I also think that they will focus not only on cars but also on trucks or aircraft in general. We all know that Elon Musk is very interested in technology. We'll see, they will still surprise us.

D: Thank you very much for the interview and your cooperation!

J: No problem!

Interview with Meriton O.

D: Hello how are you?

M: I'm good at the moment. My family and I are passing the pandemic really well and we are thankful of being healthy.

D: So first of all, thank you for joining our interview. Me and my team would like to ask you 5 questions about your car „Tesla“.

M: I'm honored to join your interview and I'm really excited.

D: Our first question. What is it like to drive a Tesla?

M: Before I bought my Tesla I had a car which was powered by petrol, to be more precise I had a BMW. The feeling of driving is way more comfortable, and I would describe it like driving on clouds. All the electronic components are more modern and makes the driving easier.

D: Ok, very interesting. How often do you use your Tesla, like per week?

M: I drive my Tesla every day because I have to go to work by car.

D: Where do you charge your Tesla?

M: I have charging station at my place and charge my Tesla overnight.

D: What are your experiences with Tesla?

M: I just made good experiences with Tesla. I can reduce my costs per year because electricity is cheaper than petrol. In my opinion Tesla is the perfect car for the city because the charge is enough for a whole day. If you want to go on a road trip it is a little bit more complicated because the charging station are getting more and more but there are also some gas stations which don't have a charger for Tesla. But for a daily car I really recommend Tesla!

D: Do you know other people who drive a Tesla?

M: Yes, at my workplace I have some colleagues and they also drive Teslas.

D: Where do you see Tesla in the future?

M: Tesla is the leading company on the whole world. There is no company which is more valuable than Tesla. Thank Elon Musk Tesla get this big and in the future Tesla is also launching some other products like a smartphone. And Elon Musk is also planning the trip to space. If he can reach this target, we will see.

D: Great! We are also very excited which is the next milestone that Tesla is reaching. In name of our team, we thank you for taking part in our interview and really appreciate the time that you gave us!

M: I also have to thank you for the exciting questions. I feel honored to be a part of your project and would like to see the final result.
