

# Learn How to Fly a Plane in Simulation

Developing Real Aviation Discipline  
through AI Enhanced Flight  
Simulation

THE HORSE PROJECT

# Expert Insights and Project Reflection

## Bhagas Dwi Atmaja

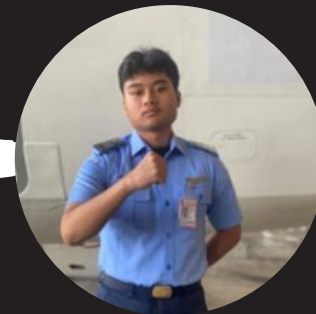

*(Licensed Pilot · Indonesian Aviation College · PT Weststar Aviation Indonesia)*

- Emergency-focused simulation training
- AI prioritizes safety & human error
- Discipline, punctuality, attention to detail

## Reflection

This project improved our understanding of aviation, flight simulation, and the role of AI in learning, while also giving us experience in intercultural collaboration

## M. Ariel Ramadhan

*(Aviation enthusiast · Student of the Airframe Powerplant Major at State Vocational School 29 Jakarta)*

- Physics fundamentals (lift, drag, thrust, weight)
- AI corrects critical flight-phase errors
- Regulations apply even in simulation
